

Product Backlog

Product Name: ONI Code Visualization

Team Name: GraalVM UCSC

Date: April 11 2020

- Integrate CallTreePrinter with the IntelliJ Plugin
 - Allow the user to run CallTreePrinter through the IntelliJ Plugin.
- Real time Updating
 - Generate a Static Analysis Report JSON upon running code.
- Improve visualization of the JSON file to display more meaningful information
 - Get the callers of each method and visualize that
 - Use an external library to make visualizations more engaging instead of just text
- Github Extension
 - Create a github extension that contains the same functionality as the IntelliJ Code Visualization.
