Product Name: ONI Code Visualization

Team Name: Team GraalVM UCSC

Sprint Completion Date: March 2, 2020

Sprint Report Plan #2:UCSC GraalVM

Actions to Stop:

- Communicate better with team members doing different user stories/tasks

Actions to Start:

- Start creating a low fidelity prototype for the presentation

Actions to Continue:

- Ask more questions
- Communicating with team members and our sponsor

Work Completed:

User Story #1: As a developer, I want to be able to follow the call trace for a selected line.

   Task 1: Modify call tree trace so that it outputs into a JSON file rather than a .txt (Time: 3)

User Story #2: As a developer, I want a plugin that opens a new window so I can see my highlighted text.

   Task 1: Open a window through the plugin. (Time 2)
   Task 2: Interact with a string by highlighting the text within Intellij. (Time 2)

Work Completion Rate:

- **Number of User Stories Completed: 2**

- **Ideal Arbitrary Effort Units: 18.3**

- **Number of Total Days: 14 days**
